

Paperless Controlled Drug Management

Innovative
eHealth

Medic8

Streamline your workflows

▾ What is Medic8?

Medic8 is a comprehensive paperless controlled drug management platform, designed for ambulance, paramedic and patient transport services. The cloud platform eliminates the hassle of recording controlled drugs in paper-based registers, saving time spent on administrative tasks whilst improving register accuracy.

Medic8 is a completely integrated solution covering central depots, regional branches and transport vehicles. The system incorporates advanced functions that assist with improving compliance and medication safety whilst reducing the potential of errors or fraudulent behaviour.

▾ The Medic8 Value Proposition

Governance

Through improved visibility, alerting, monitoring and reporting, resulting in the reduction of controlled drug diversion and misappropriation.

Compliance

Through the enforcement of precise & consistent procedures to ensure regulatory obligations are met.

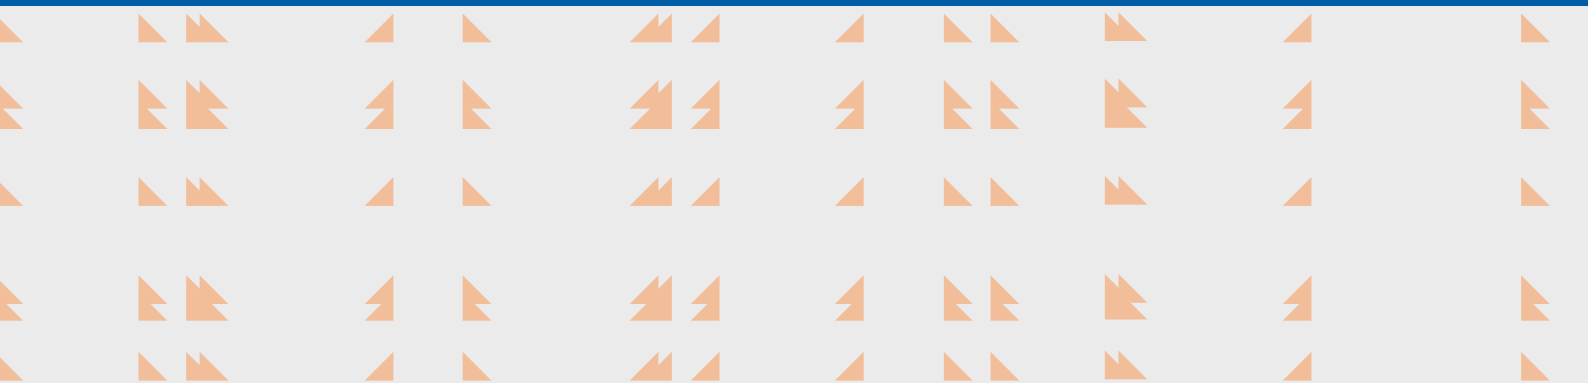

Efficiency

Through streamlining and automation of administrative tasks.

Accuracy

Through elimination of manual errors and register legibility issues.

Minimise the risk of drug diversion

▾ Governance, Regulatory Compliance & Safety

Medic8 assists users to comply with the Misuse of Drugs Regulations and provides a number of intelligent functions to assist with medication governance in order to improve controlled drug safety and reduce medication discrepancies, misappropriation or fraud.

System capabilities include:

-  Role and location-based security helps reduce the occurrence of fraudulent activity
-  Granular reporting and real-time medication discrepancy alerting supports improved investigative processes
-  Customisable settings facilitate compliance with regulatory requirements

▾ Reliability, Security & Privacy

The Medic8 platform is hosted in Tier 1 data centres in the United Kingdom providing the highest levels of performance and reliability.

To strengthen security and ensure privacy, Medic8 maintains encryption of data both at rest and in transit whilst offering features such as two-factor authentication, 24 x 7 monitoring + alerting and disaster recovery capability that includes real-time replication to a secondary hosting site.

Reduce operational costs

Register Accuracy & Operational Efficiencies

Medic8 provides a range of functions that streamline and automate administrative tasks. Integrated stock transfer functionality allows seamless automation between central depots, regional depots and vehicles.

Medic8 also has the ability to set customised vehicle medication kits for Start of Shift stock refills and End of Shift stock returns to regional depots or stations, saving paramedics and system users valuable time.

Intuitive Design

Simple to Learn. Easy to Use.

Through close collaboration with ambulance, paramedic and patient transport businesses, the Medic8 user interface has been refined to incorporate familiar terminology and workflows within a simple design that naturally guides users through various functions. This approach helps users become proficient very quickly while providing an exceptional user experience.

Portable

Medic8 is touch optimised for modern tablet and smartphone devices, allowing paramedics to use it anywhere, anytime.

▾ Comprehensive Training & Full Customer Support

We are committed to providing outstanding training and customer support. Our team has the knowledge and expertise to train and support all users of the system.

Training

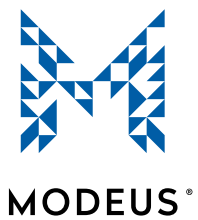

We offer both on-site and remote training. Various training material and documentation is also provided.

Support

We provide exceptional support governed by SLA response and resolution targets.
